

Ticket ID	Alert Message	Severity	Details	Ticket status
A-2703	SERVER-MAIL Phishing attempt possible download of malware	Medium	The user may have opened a malicious email and opened attachments or clicked links.	Escalated

Ticket comments
The alert was triggered after an employee downloaded and opened a password-protected executable file (bfsvc.exe) from a suspicious email. Key observations: • Inconsistency between the sender's email address and the displayed name ("Clyde West"). • Grammatical errors in the email subject and body. • The email used social engineering by pretending to be a resume submission. • The attachment was previously confirmed malicious using the provided SHA256 hash on VirusTotal. Actions Taken (Following Phishing Playbook): • Evaluated the alert per Step 2. • Confirmed malicious attachment (Step 3.0 & 3.1). • Escalated the ticket to Level Two SOC Analyst (Step 3.2) for further investigation and containment. Reason for Escalation: Confirmed malicious file + successful execution on endpoint. Immediate endpoint isolation and deeper forensics are recommended.

Additional information

Known malicious file hash: 54e6ea47eb04634d3e87fd7787e2136ccfbcc80ade34f246a12cf93bab527f6b

Subject: Re: Infrastructure Egnieer role

Dear HR at Inergy,

I am writing for to express my interest in the engineer role posted from the website.

There is attached my resume and cover letter. For privacy, the file is password protected. Use the password paradise10789 to open.

Thank you,

Clyde West
